

I would like to encourage the FCC to NOT implement any proposal that would lessen Indiana's Telephone Privacy law protections. In the past, I have been very frustrated with telemarketing calls. At one point I was even slammed! Over the last several months I have had a few calls, but they have been much easier to contend with as it is not as constant as before. Life is hectic enough without having to deal with companies and people (some of which who are very rude), at all times of the day. Please do not allow this frustration to creep back into my life! Thank you.
